

Product Performance Automation

Monthly Sales Reports by Marketplace + Single SKU Unit Report

Marketplaces: Amazon · eBay · B&Q

Purpose & Scope

Item	Definition
Objective	Analyse product performance (quantity and sales) and stock demand (single units) every month.
Reports 1 to 3	One report each for Amazon, eBay and B&Q. SKUs shown exactly as sold (single, pack and combo SKUs), with Quantity Sold and Sales Amount.
Report 4	Single SKUs only, units only, no amounts. Pack and combo sales are converted into single units for stock analysis.
Key rule	Sales amounts are never divided or converted. Only unit counts are converted, and only in Report 4.
Reporting period	Previous full calendar month, generated automatically on the 2nd of each month.
Currency	GBP. Sales Amount is the total for the line (all units), as supplied in the marketplace report.

Step 1 — Define Required Output Fields

Report	Fields	Basis
Reports 1 to 3 (per marketplace)	Month, SKU (as sold), SKU Type, Quantity Sold, Sales Amount	Actual quantity and sales; packs and combos kept as their own SKUs
Report 4 (single SKUs)	Single SKU, Units per marketplace (Amazon, eBay, B&Q), Total Units, Avg Daily Units	Units only; packs converted, combos split into components

Step 2 — Collect Marketplace Sales Data

Each marketplace report provides an ID, quantity and sales amount

Marketplace	ID Type	Sample ID	Qty	Sales (£)
Amazon	ASIN	B0B77G7BXG	2	54.74
eBay	Item ID	396889603298	3	66.15
B&Q	Product ID / barcode	5056756382308	2	40.98

Data is saved to its own raw tab (Raw_Amazon, Raw_eBay, Raw_BQ) and never overwritten, so any month can be re-run. IDs must be read as text so long numbers (eBay, B&Q) are not converted to scientific notation.

Step 3 — Master Sheet Lookup Structure

Flow: Marketplace + ID → SKU (as sold) with SKU Type and Pack Size

Marketplace	ID	SKU (as sold)	SKU Type	Pack Size
Amazon	B0B77G7BXG	WL001-2PK	Pack	2
Amazon	B0XXXXXXX9	WL001	Single	1
eBay	396889603298	WL001-3PK	Pack	3
B&Q	5056756382308	WL001-2PK	Pack	2
eBay	395000000001	CMB001	Combo	1

Sample rows for layout only. Several IDs or listing SKUs that share the same mapped SKU are added together. Pack Size comes from the suffix (2PK = 2, 3PK = 3) or the master sheet. Combos are found by a “+” in the SKU (e.g. WCCY1SQGD+LDMA60E278WW) or by SKU Type = Combo (e.g. ENC7545).

Step 4 — Send Data to Master Sheet, Clean & Map

Flow: Marketplace Report → Google Sheet → Clean & Map → Reports 1 to 3 → Convert to Units → Report 4

Automation Task	Rule	Used For
Standardise ID	Read as text, trim spaces, uppercase letters (ASINs)	All reports
Remove duplicates	Remove exact duplicate rows for the same Marketplace + ID + Period	All reports
Match ID → SKU	Lookup Marketplace + ID in master sheet; get SKU, SKU Type, Pack Size	All reports
Aggregate as sold	Sum Quantity and Sales by Marketplace + SKU + Month. No conversion; pack and combo SKUs stay as they are	Reports 1 to 3
Handle unmatched IDs	Exclude and list in Exceptions tab (Step 9)	All reports
Convert packs	Units = Qty × Pack Size, added to the single SKU (suffix nPK removed)	Report 4
Split combos	Each component gets Combo Qty × Component Qty (see Step 8)	Report 4
Single SKUs	Units = Qty	Report 4
Leave out sales	Sales Amount is not carried into Report 4	Report 4
Store history	Append monthly results to History table for trend analysis	All reports

Step 5 — Worked Example

Illustrative only. Sample lines from Step 2, plus one combo (CMB001 = WL001 + WL003, 1 each).

What appears in Reports 1 to 3 (as sold, with amounts)

Marketplace	SKU (as sold)	SKU Type	Qty Sold	Sales (£)
Amazon	WL001-2PK	Pack	2	54.74
eBay	WL001-3PK	Pack	3	66.15
eBay	CMB001	Combo	2	35.00
B&Q	WL001-2PK	Pack	2	40.98

What appears in Report 4 (single SKUs, units only)

Single SKU	Amazon Units	eBay Units	B&Q Units	Total Units
WL001	4	11	4	19
WL003	0	2	0	2

WL001 on eBay = 3PK × 3 (9 units) + 2 combo units = 11. WL003 on eBay = 2 combo units.

Step 6 — Calculate Monthly Performance

Report	Metric	Formula
1 to 3	Quantity Sold	Sum of quantity by Marketplace + SKU (as sold) + Month
1 to 3	Sales Amount	Sum of line sales by Marketplace + SKU (as sold) + Month
1 to 3	Avg Price per Item Sold	Sales Amount ÷ Quantity Sold
1 to 3	Change % (MoM)	(Current – Previous) ÷ Previous × 100, for Quantity and Sales
4	Units per Marketplace	Single units + pack units (Qty × Pack Size) + combo units (Combo Qty × Component Qty)
4	Total Units	Amazon + eBay + B&Q units per single SKU
4	Avg Daily Units	Total Units ÷ days in month (input for stock cover)
4	Units Change % (MoM)	(Current Units – Previous Units) ÷ Previous Units × 100

Step 7 — Generate the 4 Reports

Sample figures for layout illustration only. Reports 1 to 4 use the same sample data, so they reconcile.

Report 1 — Amazon

Month	SKU (as sold)	SKU Type	Qty Sold	Sales Amount
Aug-2026	WL001	Single	300	£3,450.00
Aug-2026	WL001-2PK	Pack	60	£1,380.00
Aug-2026	CMB001	Combo	30	£1,020.00
Aug-2026	WL002	Single	210	£2,730.00

Report 2 — eBay

Month	SKU (as sold)	SKU Type	Qty Sold	Sales Amount
Aug-2026	WL001	Single	100	£1,100.00
Aug-2026	WL001-3PK	Pack	20	£660.00
Aug-2026	CMB001	Combo	25	£850.00
Aug-2026	WL002	Single	60	£750.00

Report 3 — B&Q

Month	SKU (as sold)	SKU Type	Qty Sold	Sales Amount
Aug-2026	WL001-2PK	Pack	30	£690.00
Aug-2026	WL003	Single	45	£720.00

Report 4 — Single SKU Units (all marketplaces, no amounts)

Single SKU	Amazon Units	eBay Units	B&Q Units	Total Units	Avg Daily Units
WL001	450	185	60	695	22.4
WL002	210	60	0	270	8.7
WL003	30	25	45	100	3.2

Report 4 check: WL001 Amazon = 300 single + (60 × 2) pack + 30 combo = 450.

Step 8 — Report 4 Rules: Packs and Combos

SKU Type	Example	Units Added to Single SKU
Single	WL001	Qty sold, added to WL001
Pack	WL001-3PK	Qty × 3, added to WL001
Combo with “+”	WCCY1SQGD+LDMA60E278WW	Split on “+” automatically. Combo Qty added to WCCY1SQGD and to LDMA60E278WW (1 each)
Short combo code	ENC7545	Look up Combo Components tab. Combo Qty × Component Qty added to each component

Combo Components tab (master sheet)

Combo SKU	Component SKU	Qty in Combo
CMB001	WL001	1
CMB001	WL003	1

Combo breakdown (audit trail)

Combo SKU	Marketplace	Combo Qty Sold	Component SKU	Units Added
CMB001	Amazon	30	WL001	30
CMB001	Amazon	30	WL003	30
CMB001	eBay	25	WL001	25
CMB001	eBay	25	WL003	25

Step 9 — Exceptions & Data Quality Checks

Check	Condition	Automation Result
ID not in master	Marketplace ID has no match in master sheet	Excluded from all reports; listed in Exceptions tab
No SKU / SKU Type	ID found but SKU or SKU Type is blank	Excluded; listed in Exceptions tab
Unknown pack suffix	SKU ends in PK but size cannot be read	Excluded; listed in Exceptions tab
Combo without components	Short combo code not in Combo Components tab	Stays in Reports 1 to 3; listed in Exceptions; left out of Report 4
Conflicting mapping	Same Marketplace + ID has two different SKUs	Excluded; flagged for master sheet fix
Reconciliation (Reports 1 to 3)	Raw Qty and Sales – Exceptions ≠ Report totals	Mark report REVIEW before sending
Reconciliation (Report 4)	Total units ≠ singles + (pack qty × size) + (combo qty × component qty)	Mark Report 4 REVIEW before sending
Missing data	Marketplace report failed or has zero rows	Retry twice; then email alert
Unusual movement	Quantity or Sales change greater than ±50% MoM	Highlight row for review

Exceptions tab columns

Marketplace	ID	Qty	Sales (£)	Month	Reason
eBay	396889600000	1	22.05	Aug-2026	ID not in master

Step 10 — Schedule & Delivery

Item	Setting
Run date	2nd of every month at 06:00
Output	Google Sheet tabs: Amazon, eBay, B&Q, Single SKU Units, Combo Components, Exceptions, History
Filters	Month, Marketplace, SKU
Distribution	Email link to the team once reconciliation passes
Re-run option	Manual trigger for any past month using stored raw data

Step 11 — Create Automation Build Tasks

#	Task	Description	Priority	Status
1	Master sheet check	Confirm columns: Marketplace, ID, SKU, SKU Type, Pack Size	High	Pending
2	Data connections	Automate monthly sales report for Amazon, eBay and B&Q	High	Pending
3	ID → SKU mapping	Build lookup and combine IDs that share a SKU	High	Pending
4	Reports 1 to 3	Build marketplace reports with SKUs as sold, qty and sales	High	Pending
5	Combo Components tab	Create tab and “+” splitting rule	High	Pending
6	Report 4	Build pack conversion, combo splitting and single SKU units	High	Pending
7	Exceptions tab	List unmatched IDs and mapping errors	Medium	Pending
8	Scheduling & email	Set monthly trigger and distribution	Medium	Pending
9	Testing	Compare 3 past months against manual totals	High	Pending

Complete Automation Architecture

Stage	Description
1	Amazon / eBay / B&Q monthly sales reports (ID, Qty, Sales)
2	Raw data storage (one tab per marketplace)
3	Cleaning (text IDs, duplicates)
4	Master sheet lookup: ID → SKU, SKU Type, Pack Size
5	Reports 1 to 3: SKUs as sold, quantity and sales
6	Unit conversion: packs × pack size, combos split into components
7	Report 4: single SKUs, units only
8	Exceptions and reconciliation checks
9	Delivery and history storage

Assumptions to Confirm

Assumption	Please confirm
Master sheet has Marketplace, ID, SKU columns and a way to identify SKU Type (Single / Pack / Combo)	Send actual column headings
Each combo component is 1 unit unless the Combo Components tab says otherwise	Confirm
Every nPK pack is a multiple of one single product (e.g. 3PK = 3 × the same item)	Confirm no exceptions
Report figures are completed sales (returns and cancellations already removed)	Confirm per marketplace
Sales Amount is used as supplied (VAT and postage treatment unchanged)	Confirm if VAT must be removed
